EDUCATION

Taras Shevchenko National University of Kyiv

Kyiv, Ukraine

Bachelor of Software Engineering (Honours)

Sept. 2020 – June 2024

- **Coursework:** Algorithms and Data Structures, Object-Oriented Programming, Database Organization, Theory of Computing, Operating Systems, Distributed Systems, Calculus, Numerical Analysis, Data Analysis
- **Term paper:** Designed and implemented an Android application for psychological support, enhancing user engagement by leveraging a **microservices-based backend** and a **scalable client-server architecture**.

EXPERIENCE

Android Team Lead

Jul. 2025 – Present

Checkbox | *Kotlin, Java, Android SDK, Android Jetpack, Gradle*

- Delivered a full-featured **POS-system application** within **4 months**, enabling seamless use on both tablets and smartphones with **100% feature parity**, by designing and maintaining separate screen architectures tailored to each form factor.
- Increased team throughput by **25%** by hiring and onboarding a new Android developer in under **3 weeks**, through structured interviews, tailored mentorship, and recurring knowledge-sharing sessions.
- Reduced release cycle time from **3 weeks to 2 weeks**, accelerating feature delivery and feedback loops, by instituting sprint planning, codified review guidelines, and regular cross-team alignment meetings.
- Increased individual developer throughput by **20%**, by decomposing complex features into smaller tasks and distributing them efficiently across the team.

Android Developer

Aug. 2023 – Jun. 2025

Checkbox | *Kotlin, Java, Android SDK, XML, Compose, Gradle, SQLite*

- Delivered an application for **secure document exchange and digital signatures** within **2 months**, accelerating contract approval cycles by **35%** and improving compliance, by leveraging modern Android practices and implementing **Jetpack Compose** for a responsive UI/UX.
- Implemented an **inventory management module** that enabled supermarkets to easily collect and transmit stock data through the application, increasing satisfaction scores of **2 VIP clients by 18%**, by designing seamless workflows requested directly by them.
- Created integrations with several **payment providers**, increasing the project's income by **4%** through additional payment commission flows, by developing flexible API connectors and ensuring seamless transaction handling.
- Optimized application requests to the **backend**, reducing redundant network calls and decreasing server load by **8%**, by implementing request batching and smarter caching strategies.

Junior Android Developer

Jun. 2022 – Aug. 2023

5Pro Software | *Kotlin, Java, Android SDK, XML, Gradle, SQLite*

- Developed and released a **document management app with speech recognition**, allowing users to perform tasks hands-free while simultaneously recording and storing documents, which reduced manual entry errors by **25%**, by leveraging **Android SDK**, **Android Jetpack**, and Kotlin with strong security and data integrity controls.
- Raised the average **user rating** of a **golf training application** from 4.1 to **4.4 stars**, by integrating advanced media compression, a customized Echo Player, and seamless **Google Play Billing** using Android SDK and FFMpeg.
- Improved stability of the **screen capture library** under high load, reducing frame drops by **20%** and memory usage spikes by **13%**, by profiling performance and introducing memory pooling with off-main-thread encoding.

Junior Android Developer

Sep. 2021 – Apr. 2022

Skywell Software | *Kotlin, Java, Android SDK, XML, Gradle, SQLite*

- Sustained a large-scale **retail Android application** with **500k+ downloads**, improving stability and user experience, by delivering bug fixes, feature enhancements, and regular SDK updates in Java/Kotlin.

TECHNICAL SKILLS

Languages: Kotlin, Java, C/C++, Python, Ruby, Golang, JavaScript, SQL (Postgres, MySQL, SQLite)

Frameworks: Spring, Hibernate, Jetpack Compose, React, JUnit

Developer Tools: Git, Android Studio, IntelliJ, WebStorm, PyCharm, Jira

Other: Algorithms & Data Structures, Microservices, WebSockets, HTML/CSS
